

The introduction of a one-piece polypropylene shovel more than 30 years ago established Remco Products as an industry pioneer. Today, Remco maintains its presence as a trusted supplier to the food processing, pharmaceutical, janitorial, safety, and material handling industries. It provides a large selection of color-coded quality plastic products to these distinct markets.

With today's increasing focus on hygiene and cross-contamination issues, Remco has taken the approach of proactive product development to help companies comply with stringent HACCP regulations and guidelines. The color-coded tools from Remco are made from FDA-approved materials and ISO-certified, providing the ultimate step in quality assurance and safety for the various industries.

Remco not only supplies the highest in quality; it maintains personal integrity and continues to increase customer loyalty by expanding inventories and maintaining a well-earned reputation for excellent customer service. Recognized as a world leader, Remco remains dedicated to providing innovative products through its extensive network of distributors.

Remco's wide selection of products includes polypropylene shovels, scoops, scrapers, kart tubs, and mixing paddles in addition to a line of color-coded metal detectable products. Remco also offers the Vikan hygiene system® of brooms, brushes, squeegees, pails, and handles.

RQA

www.rqa-inc.com

RQA is a global leader in strategic product development, quality assurance and crisis management services to the food, beverage, personal care and consumer products industries. RQA provides solutions from concept to consumption, to multiple functions including marketing, research and development, quality assurance, operations, logistics, consumer care, risk management, legal and regulatory affairs. RQA's powerful worldwide reach, responsiveness and commitment to unparalleled service quality combine to deliver superior client satisfaction.

Founded in 1989, RQA's offices around the world are positioned strategically to respond to global customer concerns. Our professional field personnel assess product quality and market conditions in 52 countries, and perform consumer complaint and product retrieval, product recall and crisis management services. RQA offers comprehensive manufacturing services which include food safety and quality

management systems audits, and is the only firm with auditors certified to perform the FPA-Safe audit worldwide.

RQA's Product Dynamics division offers consumer research, sensory evaluation and product development services at its newly expanded, state of the art facility located just south of Chicago. Linking Q-View™ to RQA's Retail Quality Audit, companies may monitor shelf display, package condition and age, then, obtain real-time consumer opinions on overall acceptance, quality, sensory characteristics and purchase interest.

RQA's Crisis Management Services are the most comprehensive in the industry, covering the spectrum from planning activities such as policy development and crisis simulation to actual execution in the event of a product recall. Initial risk assessment and post incident response services are also offered worldwide.
