Catalent Pharma Solutions is one of the leading providers of advanced dose form and packaging technologies as well as development, manufacturing and packaging services for pharmaceutical, biotechnology and consumer healthcare companies in nearly 100 countries. Formerly Cardinal Health Pharmaceutical Technologies and Services (PTS), the company applies its local market expertise and technical creativity to advance treatments, change markets and enhance patient outcomes. Catalent's proprietary drug delivery and packaging technologies enable customers to achieve their desired clinical and market outcomes and are used in many well-known products. The company provides innovative product development, superior quality, advanced manufacturing and skilled technical services to support its customers' development and product needs.

Catalent holds more than 1,400 patents and patent applications in advanced drug delivery, biologics formulation, manufacturing and packaging. With over four million square feet of manufacturing and laboratory space spread across five continents, Catalent combines a strong global footprint with deep local market expertise to provide a sophisticated global manufacturing capability.

Services Offered:

Development

Catalent offers a full range of development services, such as pre-clinical support, API development, analytical services, drug delivery development, clinical manufacturing and packaging services. We have expertise in inhalation development, and can offer innovative biologic cell-line development using our proprietary GPEX[®] technology.

Drug Delivery

We are the world leader in drug delivery systems. Our technologies include: softgels and Vegicaps[®] Soft capsules; Zydis[®] fast dissolve dosage form; oral modified release technologies, including EnCirc[™] and EnSolv[™], and a range of inhaled technologies.

Manufacturing

We provide manufacturing for nearly every major dose form on the market today. Along with our proprietary dose forms, we also manufacture traditional oral, sterile and inhaled dose forms. We also produce biologics for pre-clinical and clinical studies.

Packaging

Catalent is the largest provider of packaging services to the pharmaceutical industry. Globally positioned, our packaging services include commercial packaging for all dose forms and the supply of printed components. We specialize in new product launch support and are the recognized leader in the packaging of biotechnology products, and the design and development of innovative compliance packaging and novel unit-dose formats. Our award winning proprietary designs include RxBarrier[®] Plus for oral solid medications, DelPouch[®] for liquids and creams, and DelStrip[®] for thin film strips.
