MAJOR MARKETS

Covidien is a global company with products and services sold in more than 130 countries. Covidien Pharmaceuticals Outsourcing has experience working with a diverse clientele, ranging from leading global companies to virtual and emerging entities. The company has a demonstrated record with the FDA as well as with customers, many who have outsourced with the company for more than 20 years.

Mallinckrodt, a company with a long history and wide range of pharmaceutical manufacturing experience, and its former parent company Tyco Healthcare are now **Covidien**.

Covidien is a global healthcare products company that manufactures, distributes and services a diverse range of industry-leading product lines, including pharmaceutical products, medical devices/supplies, diagnostic imaging agents, and other healthcare products and services. With 2007 revenue of nearly \$10 billion, Covidien's products and services are sold in more than 130 countries.

Covidien Pharmaceuticals Outsourcing is focused on providing the most responsive and flexible service in the industry. The goal is simply to be first in class. As part of Covidien, the contract manufacturing business is better positioned than ever to provide customers with effective strategies and superior service to meet production goals, timelines, and budgets. Covidien Pharmaceuticals Outsourcing is a leader in developing and manufacturing high-quality solid dose and oral liquid finished dosage products from API production through to commercial launch. Additionally, through new industry alliances, the company is now able to offer services including formulation development, clinical trial services and parenteral manufacturing.

Covidien Pharmaceuticals Outsourcing is a leader in operational excellence programs such as lean manufacturing and Six Sigma, ensuring that products are manufactured efficiently to maintain cost. Moreover, its Hobart, N.Y., facility is FDA and DEA schedule I through V-compliant.
