Founded in 1994, **Sparta Systems Inc.** is an enterprise software manufacturer that has developed innovative, 21 CFR Part 11 compliant Quality Management System (QMS) software for logging, tracking, reporting, and trending quality and regulatory issues and actions. TrackWise enables the life sciences industry to increase compliance and reduce risk by efficiently managing and tracking quality and regulatory compliance actions, including Deviations, Audits, Inspections,

World, providing an excellent fit into the existing enterprise architectures.

Sparta Systems' TrackWise is an agile, user-friendly and flexible solution designed to meet industry demands. Its architecture enables organizations to initially deploy any application, and subsequently expand the system to other processes, using the same licensed software. TrackWise delivers modularity and scalability out-of-the-box, where modules (work areas and applications) can be defined and configured by the customer.

Powerful workflow tools manage the life cycle of all quality issues and related corrective and preventive actions. TrackWise's built-in 24/7 business rule engine provides automated routing, notifications, escalations, automated execution and distribution of management reports, and automated trending and alerts. Integrated reporting via Crystal Reports® allows users to generate an array of customized reports for further detailed analysis.

CAPA, Change Control, Commitment Tracking and Complaint Handling. With over 150 FDA-regulated customers and over 300,000 end users, TrackWise has become the proven standard for managing and tracking quality and compliance related processes.

TrackWise provides a 100% configurable solution out of the box and requires no custom code. Organizations can quickly implement TrackWise without lengthy implementation processes and related costs. TrackWise provides maximum flexibility, and includes the ability to define web-based data-entry forms, user-defined fields, workflows, security permissions, reports, automated trending rules and other necessary business rules. TrackWise also provides real-time integration to leading ERP systems such as mySAP and JD Edwards One

TrackWise helps pharmaceutical organizations:

- Manage all quality and FDA compliance related processes in a centralized database with a single platform
- Enable site level, process level, and role-based security Streamline workflow with robust automation
- Escalate past due items and provide visibility to common problem areas
- Obtain information instantly using powerful ad hoc queries and personalized dashboards
- Leverage powerful status reports and metrics
- Meet 21 CFR Part 11 requirements for electronic signatures, and both record level and configuration level audit trails
- Make changes to the system seamlessly using point-and-click configuration tools

Sparta is ready to work with your organization to understand its needs and goals. In addition to providing detailed product information, our experienced pre-sales solutions team will provide your project team with an overview of industry proven solutions and best practices, and assist with implementation and deployment planning.
